

# Sparkling Clean Tile and Grout

Yes! Beautiful floors. Your ceramic, vinyl, porcelain, marble, or travertine will look almost like new.

When soil falls into the crevices of the grout, the crevices don't get cleaned because grout is below the tile level.

## Your dirty grout lines gone forever

Your tile and grout is cleaned with our state-of-the-art system that rinses with high pressured water to remove all dirt, soil, grime, and kitchen grease.

After cleaning we will either seal your grout with a clear sealer to help keep it clean. Or, to keep your grout lines beautiful, we will re-color your grout in one of 40 different colors. Our exclusive re-coloring process even comes with a 10-year warranty.

# How to Care For Your Area Rugs

Can your fine area rugs last a lifetime? Yes! Vacuuming alone can never remove all the dry soil. But now, you'll get a state-of-the-art tool that gently vibrates soil from the back of your rug **BEFORE** cleaning.

This new process remove 10 times more dry soil than even the best vacuum cleaner. Dry soil is largely the biggest culprit in destroying a wool, silk, or nylon rug. You can easily add decades of use to your rug by getting this process done.

Once your rug is thoroughly free of dry soil, the cleaning process is twice as effective. First, your rug is pre-tested to assure that it is wet cleanable. If test results show your rug isn't safe for water, a dry cleaning process will be done. Next, your rug is thoroughly
