

# Sparkling Clean Tile and Grout

Your floors will be sparkling clean with our expert cleaning and restoration systems. When your tile was installed, did you seal the grout? New tile rarely includes grout sealing. Without professional sealing, you'll spend hours keeping your

tile and grout clean. But we can fix this for you. After cleaning, we can re-color your grout a darker color (choose one of 40 colors) so it stays beautiful or seal with a professional clear penetrating sealer.
