Rug Cleaning Release and Authorization Form

Your rugs are important and we treat every rug as though it is priceless. We will do the best possible job on your rugs.

Some important things we want you to know:

- We cannot guarantee to remove all stains and discolorations. Whatever caused the stain may also have damaged the fibers. Cleaning cannot repair damage or replace lost dyes.
- Soiled fringe may never look like the original color after cleaning. Fringe may brown or tear during cleaning.
- Wear gradually damages fibers and changes their appearance which cleaning will not correct.
- Shrinking or buckling is possible any time a rug is cleaned.
- Rugs with cotton, rubber, or cloth backings may have glue holding the backing that could cause the rug to yellow or have an odor after cleaning. As well, the backing could deteriorate, shrink, buckle or become discolored. We cannot be responsible for this damage.
- Dhurries, Mexican, Sisal, and Seagrass rugs may develop unknown "dark" spots or "lighten" during cleaning.
- Deodorization is not guaranteed. Urine contamination may cause colors to run and your rug to deteriorate.
- Rugs may have hidden damage from water damage, furniture indentions, moth damage, urine damage, and dry rot. These conditions may cause permanent staining or deterioration of fibers after cleaning.

Size of rugs: _____
